Executive Summary

BSc (Hons) Information Systems undergraduate at Sabaragamuwa University with practical experience across software development, customer service, product development, and creative business. Experienced in building technology solutions including Emora, an emotion aware music recommendation application, while developing skills in mobile development, backend development, databases, cloud services, and API integration. Co-founder of Foxla Productions and founder of StrayConnect, with additional professional experience at Amana Bank PLC and Revocare Solutions. Seeking an internship where I can contribute my technical, analytical, communication, and problem-solving skills while gaining practical industry experience.

Experience

Revocare Solutions: Telemarketing Executive

Year

2024

- Engaged with prospective customers across South Asia through UK based telemarketing operations.
- Promoted company services while building professional relationships with potential customers.
- Communicated company offerings clearly and worked toward conversion targets.
- Represented company interests professionally in customer interactions.

Amana Bank PLC: Customer Service Representative

2023

- Handled inbound and outbound customer communication and responded to customer queries.
- Coordinated with branches and internal departments to resolve customer issues efficiently.
- Managed email correspondence and supported smooth information flow between customers and relevant teams.
- Worked within a 24/7 rotating schedule, developing reliability, adaptability, and customer service skills.

Projects & Current work

Foxla Productions - Film & Digital Creative Brand *(Co-Founder & Creative Director)*

Specialized in social media marketing, advertising content direction & photography.

Successfully completed **07+** projects involving brand shoots, content editing & promotional creative production. ([Social Media Link](#) & [Website link](#))

Emora - Emotion Aware Music Recommendation System *(Academic Project)*

Mobile app that detects user emotion in real time via facial recognition and recommends matching tracks through the YouTube Data API. Built end to end: Flutter (mobile frontend), Flask (backend), Firebase (data/auth), Azure (cloud deployment).

Github Repository - github.com/niruban-codes/Emora

StrayConnect - Animal Assistance & Rescue Platform *(Founder)*

Developed a full stack platform to facilitate pet adoptions and stray reporting between shelters and the public. Built a React Native mobile app for user reporting and gallery browsing, plus a responsive React.js admin dashboard featuring a modern glassmorphism UI for media and record management. Both interfaces integrate seamlessly with a centralized Firebase and Cloudinary backend.
